DETAILED ACTION

Claims 1-24 are cancelled and claims 25-50 are pending.

Lack of Unity

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species of aminocyclohexane derivative compounds in a method of treating pain hypersensitivity and neuropathic pain.

The claims are deemed to correspond to the species listed above in the following manner:

Claims 25-33, 35, 36 correspond to aminocyclohexane derivative compounds and claims 34, 37-50 correspond to aminocyclohexane derivative, neramexane compound.

The following claim(s) are generic: Claims 125-33, 35, 36 are generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The technical feature shared by the above-listed species is that an aminocyclohexane derivative compounds such as neramexane is shown to be useful in method for delaying the onset or progression of a dementia associated with a disorder of the central nervous system (CNS), reducing the risk of such dementia, or treating

Art Unit: 1617

such dementia comprising administering to a patient in need of such treatment a first amount of an 1-aminocyclohexane derivative (U.S. 2004/0087658). Moebius teaches use of aminocyclohexane derivative compounds in a method of treating dementia. Accordingly, the species listed above do not share the same or a corresponding special technical feature as required for unity of invention.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicant is required to elect a species of aminocyclohexane derivative compound. The reply must also identify the claims readable on the elected species, including any claims subsequently added.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
